## Technology Summer Internship 2015

**Location:** Budapest, Lechner Ödön fasor 8.

**Start date:** 29 June 2015

**Internship type:** 40 Hours-a-week Contract (full/time)

**Compensation:** competitive salary

Morgan Stanley is a global financial services with over 1,300 offices in 42 countries, the firm is truly global — and a market leader in the U.S., Europe and Asia as well as in emerging markets. Our multi-billion dollar investment in technology enables the development and delivery of quantitative trading systems, modeling and simulation software, analytics and security systems.

### Program Content:

The Technology Summer Internship Program is designed to develop highly motivated junior technologists within application development & infrastructure engineering and includes the following: Morgan Stanley Company Induction, Mentor Program, Technical language, proprietary environment and infrastructure, soft skill trainings, Technical and Professional on-the job training.

Interns who excel in the program may receive an offer to join the full-time Technology Graduate Program upon graduation.

### Project Opportunities

Interns are given the opportunity to work on systems such as our enterprise portal, wireless access, or components of our many trading and risk reporting systems using various technologies such .NET, JSP, Java Servlets and SOAP. Examples of projects available include the following:

- Enhancement of JAXB2 Infrastructure Application
- C# application to process XML documents in Microsoft Excel
- Creation of dynamic messaging tool within notification system, self-discovery alerting tool for IP addresses
- Infrastructure application to identify SAN service times
- Implementation of new features within Real Time Data Management Framework

### Qualifications/skills/requirements

- You have strong problem-solving, communication, teamwork and analytical skills, as well as a good command of the English language.
- You have undergraduate or graduate training (B.Sc. or M.Sc.) in Computer Science, Computer Engineering, Electrical Engineering, Mathematics, Physics and other related technical majors
- While a demonstrated interest in technology essential, experience in the financial services sector is not required.
- **For Application Development projects:** Competency in at least one programming language - C++, Java or C#, .NET, Database knowledge (SQL), good comprehension of data structures, Basic scripting language knowledge is an advantage (Perl, Python, Shell), Understanding of Linux/Unix and/or Windows operating system
- **For Infrastructure projects:** Operating system knowledge (Windows / Unix), Basic scripting language knowledge is an advantage (Perl, Python, Power Shell), Basic OO language knowledge (C#, .NET, C++), Good comprehension of data structures

### Application deadline: May 2015
