

Contents

Sujit Ghosh:

Almost Ricci soliton and gradient almost Ricci soliton on
3-dimensional normal almost contact metric manifolds 1–11

Kalyan Hansda, Tapas Kumar Mondal:

On characterization of minimal k -bi-ideals in k -regular and
completely k -regular semirings 13–22

S.M.T.K. MirMostafae, M. Naghizadeh Qomi:

A note on computing Bayesian tolerance intervals in
exponential distribution based on k -record values 23–31

H. Ansari-Toroghy, F. Farshadifar:

Second multiplication modules 33–40

Abhijit Banerjee, Goutam Haldar:

Sufficient conditions for periodicity of meromorphic function and
its shift operator sharing one or more sets with finite weight 41–65

Murat Sahin, Elif Tan, Semih Yilmaz:

The generalized bi-periodic Fibonacci quaternions and octonions 67–79

Nebojša Đurić, Daniel Velinov:

One class of special polynomials and special functions in $L^2(\mathbb{R})$ space 81–90

Fahad Alsharari, Takashi Noiri, Abdo Qahis:

New forms of strong weakly μ -compact in terms of hereditary classes 91–100

Arslan Hojat Ansari, Tatjana Došenović,

Stojan Radenović, Naeem Saleem, Vesna Šešum-Čavić:

C -class functions on some fixed point results in
ordered partial metric spaces via admissible mappings 101–116

Hammed Anuoluwapo Abass, Chinedu Izuchukwu,

Oluwatosin Temitope Mewomo, Ferdinand Udochukwu Ogbuisi:

An iterative method for solution of finite families of split
minimization problems and fixed point problems 117–136

Debananda Basua, Jagan Mohan Jonnalagadda:

Lyapunov-type inequalities for Riemann-Liouville type
fractional boundary value problems 137–152
