MAXELER | MAXELER IS HIRING!

a groq company

We are seeking people who care about how computers work with skills in science, programming and High-Performance Computing, to join our team in **Belgrade, Novi Sad** or **Kragujevac**.

To apply, email your CV to **hiring.belgrade@maxeler.com**.

JOIN THE DATAFLOW COMPUTING FUTURE!

Open positions

Paid internship (undergraduates)

- Software developer (**HPC**, Applications)
- Computer Science, Software Engineer students with an interest in High-Performance Computing
- Highly motivated and willing to work in an international multidisciplinary group

Job **position**

- We are seeking a wide variety of computational skills employed in an **HPC environment**

Careers @ Maxeler

As a member of the Maxeler engineering team, you'll learn about delivering complete computing solutions, as part of a multi-disciplinary group of computer scientists, mathematicians, physicists, and computer/electrical engineers, building advanced data processing products and services. We value people who will pitch in, doing whatever needs to be done, using whichever language, tool, or hardware is needed to deliver a project.

Benefits

- **Dedicated mentoring** with an optimal learning path
- Developing a **next-generation platform** for HPC and AI applications
- **Interesting and diverse projects:** AI, ML, quantum computing, oil&gas, blockchain, finance, NGS, autonomous systems, cyber security, etc.
- **Student-friendly** - the balance between work and study life
- **Hybrid work environment** - choose to work from office, home, or anywhere

Core Skills

- Programming in C, Python
- Familiarity with HPC, OpenMP, MPI, and Parallel Programming
- Linux
- Excellent diagnostic and communication skills
- Keen and willing to learn attitude

Desirable Skills

- C++, Java, shell scripting
- IEEE Floating Point, Fixed Point numbers
- Computer architecture
- Scientific/HPC software design with the usage of accelerators
- Computational Physics
